**A positive outlook on Japan's prospects**

'Doing Business with the Japanese gives an impressively wide-ranging introduction to the Japanese market, its scope and importance, its special characteristics and difficulties and how best to approach it. The editors and their many distinguished and experienced contributors are to be congratulated on a guide which many will find absolutely essential' - **Sir Sydney Giffard, Ambassador to Japan, 1984-6**

'This splendid and polished little volume is engagingly readable and up-to-date, with

assessment of the momentous changes now taking place in Japan. It deserves "must buy" status for businesspersons and students approaching this extraordinary country' - **Jim Bourlet, Reader in Policy Studies, London Metropolitan University**

'A novel aspect of the book is a series of short vignettes from a cross-section of people who have lived, worked or otherwise dealt with Japan. In a no-nonsense style, these give a real flavour of some of the issues in working with the Japanese. A valuable little book, containing a great deal of distilled wisdom on doing business in Japan' - **Nick Oliver, Professor of Management, University of Cambridge**

'Seeks to demystify and does it splendidly' - **Professor Ronald Dore**
